WORK EXPERIENCE

UI/UX Designer with experience at RightCapital, Amazon and IBM. I design financial advisor workflows, clarify everyday actions and build reusable interface systems—from interaction details and prototypes to implementation review.

RightCapital UI/UX Designer

May 2024 – May 2026 | Beijing · US fintech

Designed complex financial advisor workflows across the Advisor / Admin Portal, working closely with product and engineering from design through launch.

- Complex workflows. Led the redesign of 50+ pages across RightIntel, RightFlows and Risk. Personally designed Firm Admin analytics, opportunity views, workflow templates and settings; the redesign is now launched.
- Interaction clarity. Clarified status and next actions in Data Import, distinguished read-only content from editable fields, and separated selection from navigation in review flows. Established a consistent visual and interaction baseline for Risk.
- Prototypes & user testing. Conducted a qualitative usability pilot with 6 internal participants, examining navigation, action discovery and interface clarity. Synthesized observations to support design decisions and identify follow-up priorities.
- Reusable UI. Co-led layered color, typography, spacing and radius tokens aligned with DTCG. Maintained the master Figma library and specified 10+ components shipped to production, covering loading, empty, error, disabled, hover and focus states.
- Implementation quality. Partnered with Beijing engineering and Shelton product on design QA for Client Portal themes, web / PDF consistency and Redtail / Wealthbox integrations, refining spacing, controls and destructive-action signaling.

Amazon Design Lead

Jul 2022 – Feb 2024

- Led UX/UI and visual design work, translating stakeholder requirements into consistent interface and brand decisions.
- Created a reusable design system that reduced design iteration time by 28% and improved consistency across product features.
- Used an AI-assisted accessibility audit to identify visual issues and improve the share of assets meeting accessibility standards from 69% to 95% by Q4 2022.

Amazon Designer

May 2017 – Jul 2022

- Designed UX/UI, visual assets and 2D motion for 13 marketplaces across North America, Europe, India and Japan.
- Refined forms and interactive elements for Amazon US middle-funnel creative; reduced design rejection rate from 7.01% to 2.4% over the reporting period.
- Applied accessibility and global brand standards as a Prime subject-matter expert and XCM Prime brand ambassador. Led creative reviews that raised the design quality score from 2 to 3.5.

IBM Information Designer

Dec 2016 – Mar 2017

- Developed creative communication and information design for proposals within the Sales Transaction Support organization.
- Provided art direction for proposal components, defining information architecture and a consistent visual approach.

EDUCATION

The Hong Kong Polytechnic University

Master of Arts (MA)

Sep 2015 – Sep 2016

Jiangnan University

Bachelor’s degree

Sep 2010 – Sep 2014

SKILLS

Design

Interaction design
Information architecture
Prototyping
Qualitative usability testing
Visual design
Design systems
Design tokens
Accessibility
Design QA

Tools & collaboration
